Current situation

Considering 3-6 months contacts.

Focus

Security

Building APIs

Building integrations

Testing/deployment automation

Skills

Python [Django, Flask, pandas, Pyramid, scrapy]

9 years

AWS [Lambda, S3, SQS, DynamoDB, StepFunctions, ElasticBeanstalk]

5.5 years

Databases [MySQL, PostgreSQL, MongoDB, Redis]

10.5 years

Infrastructure [Linux, MacOS, Docker]

Tools [Git, Docker, CI/CD, gitlab,]

Experience

WebSafety Ninja  *Reuver, Netherlands*

April 2021 - present

Founder

IT consultancy

Mintlab  *Amsterdam, Netherlands*

May 2019 — April 2021

Senior Python Developer

Developed innovative and flexible integration platform Koppel.App, focused on (semi-) government applications, using top-edge technologies: AWS, serverless, containers, infrastructure as a code.

Developed multiple connectors, used as input and output at the integration platform

Implemented several authorization options: JWT, token-based, 2FA

Developed an integration with Exact software for education-related organization

Developed the initial version of JSON-based language for entire koppeling description and data transformations

Helloprint  *Rotterdam, Netherlands*

April 2018 — April 2019

Senior Python Developer

Build scalable API to wrap new structure for Printed products, as an integrated part of the new platform.

Automated data import process, reducing total import time from 3 days to 2.5 hours using pandas and extended ORM solution.

Developed API to provide a detailed overview of the critical part of the ordering process, combining data from different external sources, with lowest response time.

Developed and maintained several scrapers to populate information from external sources using API aside reverse-engineering and scraping technics.

Ginger Payments 🇳🇱 *Amsterdam, Netherlands*

November 2016 — May 2018 (1 year 6 months)

Python Developer

Created automated API-level testing robot

Created custom database viewer as replacement of default AWS viewer, with focus on current business requirements.
